

XAMS Starter Services

Reach your authorization goals

OUR XITING STARTER SERVICE PORTFOLIO

SAP Security Check (ERP-SECCHK)

This service is a system check on your security risks. We document the weaknesses and take stock of your current SAP security situation. The service takes three days.

Best Practice Workshop (BPW)

We demonstrate the typical use cases with XAMS. During the workshop we install and configure all relevant XAMS subjects. We also perform a proof of concept or focus on dedicated topics. The service takes two days.

SAP System Analysis incl. S/4 Check (ERP/RFC-SYSCHK)

We estimate the project efforts as well as the determination of complexity. The service also includes an analysis of the role concept regarding the migration to S/4. Further we reach an agreement on the project parameters. The service takes two days.

Project & Product Workshop

Our consultants perform all project steps with the help of XAMS. The workshop includes the installation and configuration of all relevant XAMS subjects. The service takes three days.

S/4HANA Workshop (WS-S4HANA)

The workshop includes a demonstration of the migration process for authorizations in S/4HANA using XAMS. You get an overview about the architecture of S/4HANA and Fiori authorizations. The service takes one day.

XAMS PoC Support (POC-XAMS)

We support typical use cases with XAMS, the XAMS proof of concepts as well as the installation and configuration of XAMS. The support is relevant for project managers, project members and security administrators during trial periods.
