

# Xiting Security Platform

## The Innovation Platform for Comprehensive Security Management

The **Xiting Security Platform (XSP)** is a cloud-based solution that acts as a central platform to ensure compliance in a hybrid SAP landscape that includes both on-premises and cloud applications. The top use cases of Xiting's new solution are designed to revolutionize your SAP security management with comprehensive coverage, seamless integration, and advanced analytics.

Embrace the potential of the Xiting Security Platform (XSP) to support your business growth and cloud strategies. Harness the power of our cloud-based solution to adapt and expand your operations without the constraints of traditional on-premises solutions. Secure your SAP ecosystem with XSP's state-of-the-art features and capabilities.

Xiting provides a comprehensive platform for ruleset creation, management, and SoD (Segregation of Duties) risk analysis across on-premise, hybrid, and cloud SAP systems. This central hub empowers customers to conduct cross-risk analysis with precision and supports S/4HANA license optimization, utilizing the SAP Star Ruleset to drive down operational and licensing costs at the user level. Additionally, the Xiting Security Platform offers a real-time Security Dashboard to monitor threats, a library of security patterns, and patch management tools to safeguard your SAP environment. Emergency Access Management further enhances the platform's capabilities, enabling robust risk oversight and response.

The Xiting Security Platform is built on the security standards of the SAP Business Technology Platform and can be deployed in multiple regions worldwide. This means that customer-specific configurations for on-premises and SaaS systems, as well as customer-owned cloud connectors, destinations, and identity providers, are also supported. The agile and rapid deployment enables efficient updates to the application.

### THE KEY FEATURES OF THE XITING SECURITY PLATFORM

License Analysis and Optimization

Cross-System SoD Risk Analysis

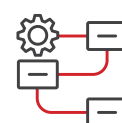

Security Monitoring & Real-Time Threat Detection

Centralized Identity Consolidation

Seamless integration with SIEM tools and XAMS

Connector for IAM solutions and SAP Access Control (GRC)
